# WDM Road Assessment Vehicle Condition reporting

The Department for Transport are developing a new reporting standard for national reporting which is scheduled for roll out in 2024/25. This will apply a 1 – 5 rating for condition.

WDM have collected, processed, and reported condition indicators for Local Authority clients since the 1990's using deflectograph, visual surveys and SCANNER, and will support the reporting to the new standard.

The WDM Road Assessment Vehicle provides a proven data collection method that enables Highway Asset Managers to make long term plans to manage their network
